Title of the First Paper of the First Issue of Journal of Digital Assets

John Doe and Jane Roe

Abstract

An abstract is a short summary of the paper, usually about a paragraph (containing 6-7 sentences and 150-250 words) long. It includes the research question posed, its significance, the methodology, and the main results or findings. The main body coming after the abstract includes, but does not have to be, an introduction, methodologies, experiments and analyses, results, conclusions, and references. If necessary, an appendix or appendices can be attached at the end of the paper. The length of the paper should be less than 10 pages. If there are more than 10 pages, an additional charge may occur per page from page 11 onwards. Papers that are too long may be rejected. All authors are required to submit original manuscripts that have not been submitted or published in other journals. Papers presented at other academic events such as conferences, workshops, seminars or symposiums, and published prepublications such as arXiv can be reviewed. In the footnote at the bottom of the first page, corresponding author must indicate the name and date of the academic event or prepublication where the paper was published.

Keywords: Blockchain, cryptocurrency, decentralized finance, regulation, smart contract

---

I.   INTRODUCTION

ALL papers should be written using this template. Section formats can be generated by copy-and-paste of the section title INTRODUCTION. Section numbers will be generated automatically. Subsection title can be generated automatically by the same manner like the Sections. See the following subsection A below:

A.   Subsection Title

Equations can be written using MS-Word math equation editor. Centering equations with a right-justified manner must be followed.

$$V\big(\boldsymbol{q}_0(x_0, y_0)\big) = \frac{y_0}{x_0} \cdot x_0 + y_0 = 2y_0. \tag{1}$$

The first paragraph is not indented, but after the second paragraph it must be indented. This template allows cross reference format. When you click on a citation, it turns gray to indicate that cross-references are possible.

J. Doe is with the School of Cybersecurity, Korea University, Seoul, 02841, South Korea (e-mail: j.doe@korea.ac.kr).

J. Roe is with the Department of Electrical and Computer Engineering, Seoul National University, Seoul, 08826, South Korea (e-mail: j.roe@snu.ac.kr).

Corresponding author: J. Doe.

References should be listed alphabetically by the author's last name. Therefore, you can see that the order of the citation numbers does not start with 1 in the following sentence.

Smart contracts on blockchain [4] are an important building block for many applications, including smart grid [3], and vehicular device [1].

Caption of figure should be placed below the figure. Figure number should go as Figure 1 in the text, and **Fig. 1** in the caption. For example, Figure 1 is shown below.
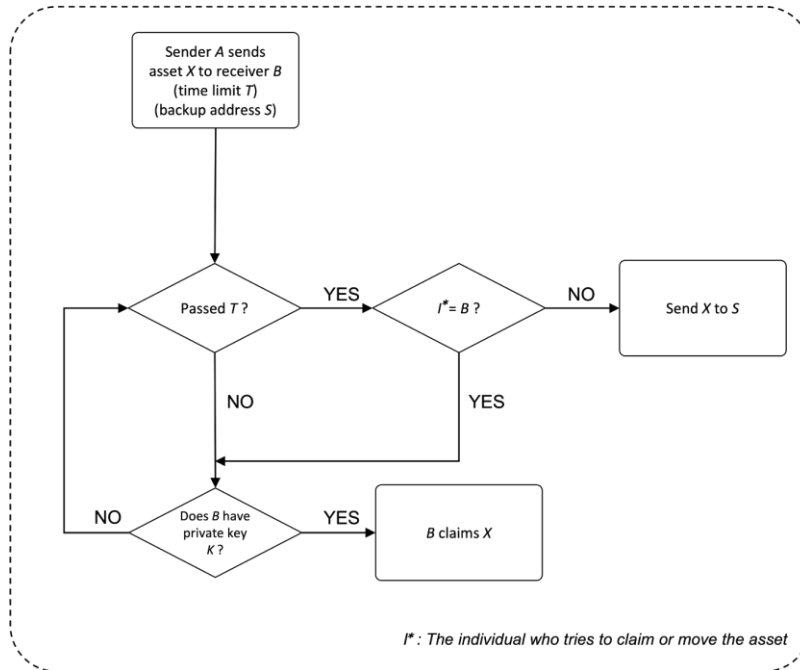

Fig. 1. Flowchart for workflow logic of the proposed method [2].

Caption of the table should be placed over the table.

Table 1. Symbol of three accounts.

Symbol	Meaning
A	Address of a sender's account
B	Address of a receiver's account
S	Address of a backup account
